

Özdisan Elektronik Pazarlama San.Tic. A.Ş.

Integrated Management System Policy

- To effectively operate the integrated management system designed to meet customer demands and management standards, ensuring continuous technological growth and development in all areas of our commercial activities.
- To continuously improve processes with measurable results through the effective operation of management systems.
- To enhance customer satisfaction by meeting orders with timely and high-quality products, and by addressing customer demands and needs appropriately.
- To comply with legal regulations, customer requirements, and the necessary aspects of integrated management systems, and to continuously improve them.
- To aim to prevent environmental pollution and minimize waste.
- To provide healthy and safe working conditions for our employees within the scope of occupational health and safety, manage and minimize risks.
- To evaluate risks and opportunities that could affect the suitability of products and services, take necessary measures to reduce the impact of risks, and carry out preventive actions.
- To increase employee awareness of the integrated management system and to develop it through training, in line with company goals and objectives.
